RULES OF THE ROAD

1. **HELMETS ARE A MUST** No Questions! You cannot grow a new brain.
2. **MAINTAIN CONCENTRATION** Always be aware of what is in front of you. Avoid looking behind you. Save your sightseeing for the side of the road.
3. **AVOID ALL DISTRACTIONS** Do not attempt to adjust clothing, clean glasses, use your phone, use camera, or smoke while riding.
4. **KEEP BOTH HANDS ON THE HANDLEBARS AND BOTH FEET ON THE PEDALS** at all times to best maintain full control of the bike.
5. **AVOID PANIC STOPS** Steady pressure on the brakes is best for a smooth stop. Front and rear brakes should always be used at the same time to prevent going over the handlebars or skidding out.
6. **SINGLE FILE SPACING** Local authorities say you cannot ride side by side. Just like any other vehicle on the road --You must ride single file. Keep at least 40-50 feet between bicycles to allow enough space to maneuver if the lead bike is to stop suddenly. There are no brake lights on bikes.
7. **STAY TO THE RIGHT & AVOID THE CENTERLINE** Avoid traffic as best as you can, ride as far to the right of your lane as possible and close to the white line. Avoid the center line. Up-hill traffic can cross the center line especially in sharp turns.
8. **IF A BIKE LANE IS PROVIDED PLEASE USE IT** When there is suitable space beyond the white line, please use it with caution. If you don't feel safe doing so, please stay as close to the white line without compromising your safety. Avoid the edge of the pavement and guardrails.
9. **YIELD TO DOWNHILL TRAFFIC** This goes for both bikers and vehicles. When being approached from behind, maintain a straight line, but allow room for the passing vehicle to overtake you.
10. **PASS WITH CAUTION – SOUND OFF** When you are overtaking another bicycle, do so with caution and only when safe and in a straight away. Let them know you are coming around on their left.

11. **SLOW BEFORE ALL CURVES AND TURNS** You won't be able to tell how sharp a turn can be until it's too late.
12. **NEVER STOP IN A BLIND CURVE OR TURN** You can never tell what's coming up in front of you or up from behind you. Wait for straight sections for best visibility if stopping.
13. **NO STUNT RIDING** Enjoy your ride, but make safety your priority. No "S" turns, slalom , or off road riding.
14. **SLOW FOR CATTLE GUARDS** Stay straight and steady and avoid using brakes while in contact with metal grating.
15. **COMPLY WITH ROAD LAWS AND OBSERVE ALL POSTED STREET SIGNS.** Stop at stop signs and when crossing the street. Your bike is a licensed vehicle, so obey all traffic laws.
16. **RIDE AT A SAFE SPEED** Everyone has their own comfort zone. Ride responsibly and safely. You determine what a safe speed is for yourself.
17. **BE MINDFUL OF THE WEATHER** The weather can be unpredictable. Sun, rain, fog, heat, and cold can all affect your ride. Please use caution when dealing with these elements.
18. **STOP IF YOU DO NOT FEEL SAFE** If you are having trouble with your bike or weather conditions are causing you problems, or just do not feel safe, by all means STOP! Take a short breather and as conditions improve you may want to return to your bicycle. Our staff will be ready to assist you if you do decide to give us a call.

We reserve the right to remove you from the tour if you are a danger to yourself, others, or for any other reason.

If at any time you need assistance, we are a phone call away.

BE SAFE and HAVE FUN!
